## STATEMENT OF QUALIFICATIONS

### GROCERY STORES

---

- **Project:** **Raley's 813**  
**Location:** Albuquerque, New Mexico  
  
**Significance:** Electrical engineering and design for a 52,500 square foot supermarket tenant improvement. Design included power, lighting, telephone & computer systems for bakery, café, old fashioned deli/ grill, fish & meat prep areas, natural foods, cosmetics, produce, floral, main sales floor, and office areas.
  
- **Project:** **Raley's 227**  
**Location:** Roseville, California  
  
**Significance:** Electrical engineering and design for a 65,794 square foot grocery store. Design included electrical system load calculations, Title 24 lighting compliance calculations, one line diagram and design of computer room power up to and including UPS systems. Branch circuiting was done for the natural foods, cosmetics, produce, floral, remodeled pharmacy, and to the kitchen equipment in the bakery/café, old fashioned deli and fish & meat prep areas.
  
- **Project:** **Raley's 310**  
**Location:** Turlock, California  
  
**Significance:** Electrical engineering and design for a 65,794 square foot grocery store with bakery, café, old fashioned deli, fish & meat prep areas, natural foods, cosmetics, produce, floral, pharmacy, main sales floor and office areas. Design included power, lighting, telephone & computer systems and modifications to the machine room.
  
- **Project:** **Raley's 422**  
**Location:** Placerville, California  
  
**Significance:** Electrical engineering and design for a 67,000 square foot grocery store. Lighting plan included fixture schedules and branch circuiting to modify the existing lighting layout. General sales area lighting was replaced and re-circuited. Power plan included power distribution, convenience outlets and power to new mechanical and refrigeration equipment.

- **Project:** **Nugget Market**  
 Location: West Sacramento, California

Significance: Electrical engineering and design for a 40,217 square foot grocery store including bakery and deli. Design criteria involved one line diagram, electrical system load calculations, Title 24 lighting compliance calculations, and electrical circuiting to kitchen equipment.
  
- **Project:** **Nob Hill 634**  
 Location: Mountain View, California

Significance: Electrical engineering and design for a 63,496 square foot grocery store. Design included one line diagram, electrical system load calculations, tech room power up to and including UPS system, telephone raceway, outlets and backboard, and computer raceway and outlets for check stands and new office areas.
  
- **Project:** **Nob Hill 615**  
 Location: Capitola, California

Significance: Electrical engineering and design for a remodel of a 36,100 square foot grocery store with bakery, café, old fashioned deli, fish & meat prep areas, natural foods, cosmetics, produce, floral, main sales floor, and office area. Design included power, lighting, telephone & computer systems and modifications to the machine room.
  
- **Project:** **Raley's 410 Lighting Design**  
 Location: Folsom, California

Significance: Developed lighting design and requirements based upon Raley's Standards and the Décor Design intent. Completed Title 24 energy calculations for interior lighting design, and coordinated with Décor Consultant on lighting selection and incorporated into lighting legend and drawings.
  
- **Project:** **Raley's 443**  
 Location: Elk Grove, California

Significance: Developed lighting design and requirements based upon Raley's Standards and the Décor Design intent. Completed Title 24 energy calculations for interior lighting design, and coordinated with Electrical Engineer on circuits for lighting.
  
- **Project:** **Bel Air 528**  
 Location: Natomas, California

Significance: Developed lighting design and requirements based upon Raley's Standards and the Décor Design intent. Completed Title 24 energy calculations for interior lighting design, and coordinated with Décor Consultant on lighting selection and incorporated into lighting legend and drawings.

- **Project:** **Raley's 632**  
Location: Alameda, California  
  
Significance: Developed lighting design and requirements based upon Raley's Standards and the Décor Design intent. Completed Title 24 energy calculations for interior lighting design, and coordinated with Décor Consultant on lighting selection and incorporated into lighting legend and drawings.
  
- **Project:** **Nob Hill 634**  
Location: Mountain View, California  
  
Significance: Developed lighting design and requirements based upon Raley's Standards and the Décor Design intent. Completed Title 24 energy calculations for interior lighting design, and coordinated with Electrical Engineer on circuits for lighting.
  
- **Project:** **Raley's 814**  
Location: Albuquerque, New Mexico  
  
Significance: Developed lighting design and requirements based upon Raley's Standards and the Décor Design intent. Completed Title 24 energy calculations for interior lighting design, and coordinated with Décor Consultant on lighting selection and incorporated into lighting legend and drawings.
